

Dr. Jorge Camina Honored as Community Business Leader by Gulfshore Business Magazine

Press Release: September 16, 2008

Naples, FL – Dr. Jorge Camina, Jr., M.D. has been named as one of SW Florida's business leaders by Gulfshore Business Magazine. Dr. Camina excelled to the position of Chief of Pediatrics for CHS Healthcare's "Children's Health Network" group of six office locations. He makes a positive difference in the health of children in the Collier County Community everyday. He was one of the first physicians with the Ronald McDonald Care Mobile® Program and continues to work with that program. Jules Mijares, Care Mobile Manager, said it best, "Dr. Camina's actions on a daily basis show the depth of caring and compassion he has with his patients and their family members." Many of his patients don't speak English. Dr. Camina has found that patients sometimes understand drawings better than words, "It helps when they can visualize," he said. So that is the path he takes, he will draw diagrams and pictures, anything to help patients understand. Dr. Camina tries to teach patients about their health. "I work with them," he says, "until they understand."

Dr. Camina's primary practice is at Golden Gate Pediatrics, but his role as chief keeps him busy with responsibilities that reach to the other pediatric offices under the Children's Health Network umbrella. CHS is a non-profit organization which serves most of our counties needy children, around 29,000 per year. Dr. Camina continues to work with the Ronald McDonald Care Mobile Program in Collier County.

Dr. Camina attended the University of Miami, Ponce School of Medicine and completed his pediatric residency at the University of Florida. He is originally from Miami.
